The Motherboard
By Michael Soi

30 Aug - 16 Sept 2017

Michael Soi, Kenyan born 1972

Soi is a painter with a long and illustrious career in Nairobi.

Renowned for his commentary on socio-political issues that concern Kenyans, he has a reputation for showing up hypocrisy and corruption and other topics that people would prefer to hide from society.

This exhibition shows, for the first time, photographs of the artist working directly with the human body.

Soi has shown extensively locally and internationally, most recently in Japan and is currently working on his first solo show in West Africa in Accra early 2018

Circle Art Agency was founded in 2012 in Nairobi to provide an professional advisory service to individual and corporate collectors and art institutions, and build audiences through curating ambitious exhibitions.

In 2015, we opened our permanent gallery space, aiming to be the foremost exhibition space in East Africa. Our intention is to create a strong and sustainable art market for East African artists by supporting and promoting the most innovative and exciting artists currently practicing in the region. We exhibit carefully curated, challenging and thought-provoking contemporary art.
